

Fasika Solomon

Software Engineering Student | Backend & Full-Stack Development

📍 Addis Ababa, Ethiopia | ✉ fasikasolomon97@gmail.com | 🌐 github.com/fasikaill | 🌐 Portfolio

Professional Summary

5th-year Electrical and Computer Engineering student at Addis Ababa University with hands-on experience building full-stack web systems and backend services. Strong foundation in **TypeScript, Python, Java, PostgreSQL, REST APIs, authentication, real-time communication, and testing**. Experienced in working across frontend, backend, and data layers to implement structured business workflows.

Technical Skills

Languages	TypeScript, JavaScript, Python, Java, SQL, HTML, CSS
Backend	Node.js, Express, FastAPI, REST APIs, JWT, WebSockets
Frontend	React, Next.js, Vite, Tailwind CSS, React Query, Zustand
Data	PostgreSQL, MySQL, Prisma, SQLAlchemy, Redis, Alembic
Testing / Tools	Jest, Vitest, Playwright, Supertest, Storybook, Git, GitHub, Docker, Linux

Selected Projects

Dinkenesh Event Management System

Full-Stack

React, Vite, Node.js, Express, PostgreSQL, Prisma, Redis, JWT, Socket.IO

- Contributed to event discovery, organizer operations, ticketing, payments, QR check-in, moderation, analytics, and notifications.
- Implemented the **Super Admin / Organization Moderation and Banning workflow** across frontend and backend, with dedicated unit and integration tests.

github.com/fasikaill/Dinkenesh-Event-Management-System

Event Management System

Full-Stack

Next.js, React, TypeScript, Prisma, PostgreSQL, Redis, WebSockets, Better Auth, Chapa

- Built a modular platform covering events, tickets, reservations, payments, check-in, notifications, moderation, and integrations.
- Worked with relational domain models, authentication, QR ticket flows, Redis-backed workflows, background workers, and WebSocket services.

github.com/fasikaill/Event_Management_System

Centralized Crime Management System (CCMS)

Full-Stack

Next.js, TypeScript, FastAPI, Python, PostgreSQL, SQLAlchemy, Redis, Docker

- Developed application workflows for cases, evidence, personnel, departments, court cases, reports, and administration.
- Worked with modular frontend architecture, permission guards, reusable components, and verification using Vitest, Playwright, and Storybook.

Education

Addis Ababa University

2022 – Present

B.Sc. Electrical and Computer Engineering — Computer Stream

Relevant coursework: Data Structures, Data Communication, Database Systems, Digital Logic Design, Object-Oriented Programming, Computer Architecture, Software Engineering

Additional

Focus	Backend engineering, system architecture, databases, real-time systems, authentication, testing
Seeking	Software engineering internships and junior software engineering opportunities
